PROFILE

Motivated and detail-oriented Data Scientist with 6 months of hands-on experience in data analysis, visualization, and reporting. Skilled in using analytical tools such as Excel, Power BI, and modern UI/UX principles to deliver actionable insights. Strong foundation in information technology, currently advancing academic and technical expertise through a BS in Information Technology.

WORK EXPERIENCE

Data Scientist

JAN 2024 - JUL 2025

- Worked on exploratory data analysis (EDA) to identify trends, correlations, and anomalies in datasets.
- Built interactive dashboards and visual reports using Power BI for data-driven decision-making.
- Applied UI/UX principles to design clear, intuitive, and visually appealing dashboards.
- Performed data cleaning, preprocessing, and transformation to ensure accuracy and reliability.
- Used data storytelling techniques to communicate findings effectively to non-technical audiences.

UI/UX Designer

Jan 2021 - Dec 2023

- Designed user-friendly interfaces for websites and dashboards with a focus on clean layouts and smooth navigation.
- Created wireframes, prototypes, and mockups to visualize user flows.
- Applied color theory, typography, and responsive design principles to improve user experience.

Office Productivity Specialist

Jan 2021 - Dec 2025

Word, Excel, PowerPoint

- Develop and maintain strong relationships with partners, agencies, and vendors to support marketing initiatives.
- Monitor and maintain brand consistency across all marketing channels and materials.
